Loading 1,000 lbs. of Air Mail into an N-A-T plane.

N-A-T plane leaving New York for the west.

Loading Air Express. N-A-T planes have an average capacity of 1,000 lbs. of express or mail.

Airport floodlights make landing fields as bright as day.

Air Mail and Air Express Information

How Much Time Does Air Mail Save?

Air Mail travels three times as fast as ordinary mail, and usually saves one business day in delivery—sometimes more! Letters sent by Air Mail fly at an average speed of 100 miles an hour. Ordinary mail usually travels at an average speed of 35 miles an hour.

How Much Does It Cost to Send a Letter by Air Mail?

Five cents for the first ounce, and ten cents for each additional ounce, to any point in the United States or its possessions, Canada, or Mexico. No other postage is necessary. An ordinary letter of three or four sheets usually weighs an ounce or less.

Can Air Mail Be Insured, Registered, or Sent C. O. D. or Special Delivery?

Yes. Just the same as ordinary mail.

Can Air Mail Be Sent in Ordinary Envelopes?

Yes, Air Mail can be sent in the same envelopes as ordinary mail, if desired. Write "Via Air Mail" plainly on the address side if ordinary envelopes are used.

Air Mail envelopes are available at most stationery stores, and special Air Mail stamped envelopes are on sale at all postoffices. The use of Air Mail envelopes is recommended.

Can Air Mail Be Posted the Same as Ordinary Letters?

Yes, in any mail box, chute, branch or main postoffice. If Air Mail collection time is not shown on boxes or chutes, ask your postmaster.

Can Packages Be Sent by Air Mail?

Yes, if they do not weigh more than fifty pounds or measure more than eighty-four inches combined length and girth.

Is Air Mail Given Preference over Ordinary Mail?

Yes. U. S. Post Office Department order issued Nov. 9, 1928, reads:

"Air Mail must be given special attention and must not, under any circumstances, be handled as ordinary mail."

Can Air Mail Be Sent to or From All Postoffices in the United States?

Yes. If the postoffice is not on an Air Mail line, the mail is carried by ordinary methods to or from the nearest Air Mail station. Follow the usual mailing procedure. Mark envelope "Via Air Mail."

Can Air Mail Be Sent to Foreign Countries?

Yes. The regular U. S. Air Mail postage will carry Air Mail to points in Mexico and Canada by air without additional charge.

(Contd. to next col.)

(Contd. from left hand col.)

Air Mail addressed to other foreign countries (and to be carried by air only in the United States) requires 4c. for the first ounce and 8c. for each additional ounce plus the postage required for ordinary mail (not Air Mail) addressed to the particular Country involved.

The postage rate for Air Mail to be flown both in this country and abroad varies with the foreign country concerned. Call your postoffice for information about any specific country.

Can Express Be Sent by Air?

Yes. National Air Transport, Inc., and practically all other Air Mail contractors carry "Air Express" under contract with the Railway Express Agency in the same planes with the Air Mail and at the same speed. Air Express, like Air Mail, reaches every city in the United States by rail or other connections.

Does the Railway Express Agency Pick Up, Deliver and Insure Air Express Parcels?

Yes. Call the nearest office of the Railway Express Agency for complete information on rates, service, etc.

What Are Some of the Profitable Uses of Air Mail and Air Express?

Use of this 100-mile-an-hour air transportation is by no means confined to banks, bond houses, or large business concerns. Today these and thousands of others use Air Mail and Air Express regularly for soliciting new accounts; shipping of samples, and movie films; for special direct-mail advertising campaigns; for overnight distribution of market reports; making sales reports; for expediting the handling of orders and shipments of merchandise.

Air Mail, in many instances, is being used instead of night telegrams at a considerable saving of money. Advertising agencies and publishers now rely upon its speed in forwarding advertisements, drawings, and copy.

An increasing amount of social correspondence is being sent by Air Mail. Its speedy transmission adds distinction that an ordinary letter does not have.

National Air Transport, Inc.

National Air Transport, Inc., has been carrying Air Mail over the line between Chicago and Dallas since May 12, 1926, and between New York and Chicago since September 1, 1927. Air Express has been carried over all N-A-T lines since September 1, 1927.

N-A-T planes have flown almost 5,000,000 miles (1,600,000 miles at night) and have carried almost 2,250,000 pounds of Air Mail and Express.

N-A-T planes fly 6,500 miles each day. At least one N-A-T plane is in the air each hour of the twenty-four.

In its daily operations in the service of the public, N-A-T uses 40 planes. Thirty-six government-licensed pilots of long experience in the Air Mail service fly these planes.

For further information, call or write nearest N-A-T office.
