

WESTERN AIR LINES

APRIL 1st, 1947

NOW FOR THE FIRST TIME
Through Service Between California, Denver
 AND
MINNEAPOLIS-ST. PAUL
 via WESTERN all the way

Two important new air routes between Minnesota points and the West will be opened by Western Air Lines when through service to and from Minneapolis-St. Paul is inaugurated on April 1.

TWIN CITIES-DENVER-LOS ANGELES

Fast, through service between Southern California and Minneapolis-St. Paul, saving hundreds of miles and hours of travel time via Denver. Only three stops en route.

TWIN CITIES-SHERIDAN-GREAT FALLS

A new East-West route linking Minneapolis, St. Paul and Rochester, Minnesota, to the principal cities of South Dakota, Wyoming and Montana.

These two new trunk air routes bring distant population centers to within a few hours' travel time . . . strengthening community interest and building commerce and trade.

The through service offered by Western Air Lines means quick confirmation of your reservations requests and shortened travel time to many points. On your next trip, fly Western.

All fares subject to 15% Federal Transportation Tax

ONE-WAY FARES

Half fares for children between two and twelve years of age. Babies under two, and not occupying a seat, are carried free.

21 YEARS OF GROWTH

First to come of age, Western, the nation's pioneer airline, celebrates its 21st birthday on April 17th.

These 21 years represent but a small fraction of America's industrial life, but they encompass the entire history of commercial air transportation.

During this short period of time the airplane has developed from a barnstormer's frail toy to a swift giant of the skies, carrying scores of passengers and tons of cargo at speeds of five miles per minute.

Today, no country in the world is more than 60 hours distant by air. Frequent flights span both Atlantic and Pacific and the day of regular 'round-the-world' passenger and freight service is not far off.

Western Air Lines is proud of its position as a pioneer in this great industry—proud, too, of its many contributions to the speed, comfort and safety of modern air transportation. We firmly believe that even greater growth and development are in store during the years just ahead.
