Time Table and Fares Effective
from
6th OCTOBER, 1957.

IRAQI
AIRWAYS

PASSENGER REGULATIONS AND GENERAL INFORMATION

Cancellation of Reservations.—

If you have to cancel or defer your reservation, please let us know at the earliest possible moment and return your ticket. We cannot guarantee refund of fare for reservation cancelled or transferred at short notice.

Airport Departure Formalities.—

It is essential that you report to the departure Terminal or Airport no later than the time advised, as this allows the minimum time to complete all embarkation formalities. Flights cannot be delayed for passengers arriving late and we cannot accept any responsibility in such cases.

Children and Infants.—

An infant under two accompanied by an adult, and not occupying a separate seat, is usually charged 10% of the normal adult fare. Additional infants under two accompanying the same adult, an infant under two occupying a separate seat and children between the ages of two and twelve are charged half the normal adult fare. Age is taken as at the beginning of the outward journey.

Prohibited Articles.—

Government regulations do not permit the carriage of inflammable or explosive material in aircraft. You are, therefore, reminded not to carry in your baggage or on your person any articles which are easily ignited, such as cigarette lighter fluid, matches, photographic flash bulbs, etc. The only exception is that where smoking is allowed on aircraft, you may carry a small supply of safety matches, or a lighter on your person.

Punctuality.—

Although we do everything in our power to ensure the punctuality of our services, Iraqi Airways, cannot accept responsibility for any delay or suspension of a service, nor can we guarantee that connections will be made with other air services or with surface carriers.

ISRP—597—10-57—16,500 bks

V I K I N G

The Viking, a post-war medium range airliner, of which 162 were built by Vickers-Armstrongs, is being operated by four Governments and eleven major airlines. It is propelled by two Bristol Hercules engines and accommodates 27 passengers, cruising at a speed of 210 miles per hour, at a normal operating height of 10,000 feet.

VISCOUNT

The Viscount was the world's first propeller-turbine airliner. It is powered by 4 Rolls-Royce Dart engines. They are basically Gas-Turbine, working in exactly the same way as in a Jet Fighter. The main difference is, of course, that the turbo-prop engine harnesses the energy of the "Jet Stream" to drive a propeller. This makes it smooth and constant in its operation.

The Viscount cabin is fully pressurized, heated and airconditioned, and at 25,000 feet the cabin altitude is 5,500 feet only. Cruising speed is 325 miles per hour and cruising height is up to 25,000 feet.
